

If you need to manage a project to transform a warehouse activity in your organisation, this book is for you. Built on over 40 years' experience of warehouse operations, this book is a step-by-step guide to setting up your project, assembling a team, building good stakeholder relationships and managing delivery.

It highlights ways round common pitfalls and challenges in warehouse transitions whilst providing real-life examples of what can make a warehouse change successful – or unsuccessful.

Designed for project managers undertaking a warehouse-based project for the first time, and experienced logistics managers new to project management, this book covers theory and practice, explains common jargon and provides a road map through change in warehousing. Complete with four case studies and 10 downloadable templates, this is a practical guide and resource that will prepare you for the challenges of managing transitions in warehousing.

Rod Turner has been active in logistics for over forty years, working in multiple industries (third party logistics, retail, fast moving consumer goods, brewing, luxury goods, electronics and engineering) and multiple countries and regions (Europe, Asia and North America). Following on from operational roles early in his career, he has gained extensive experience in continuous improvement in logistics; managing changes (closures, openings, relocations and automation) in warehouse operations; and tendering, negotiating and contracting warehouse activities. Rod has a Bachelor's degree in Geography from Bristol University in the UK, and a Master's degree in Logistics and Supply Chain Management from Cranfield University in the UK. He is a Member of the Chartered Institute of Logistics in the UK. He is married with two adult children and now lives in East Yorkshire in the UK
